Southern Counties Express

Walmart Stores

We're committed to cleaning the air and creating a sustainable environment in and around Long Beach by putting clean trucks on the road today – as quickly as we can.

Mayor Foster challenged us to replace old model dirty trucks, and we're meeting that challenge.

The Port of Long Beach set standards that ensure only the cleanest trucks available will call on the port, and we support those standards. We've been developing voluntary industry solutions that replace older trucks and reduce truck emissions.

It won't be cheap, and it won't be easy, but we know it's the right thing to do.

Our members have already begun to put natural gas-powered and newer, Clean Diesel trucks into service. These trucks, the cleanest trucks on the market, meet 2007 and even 2010 United States Environmental Protection Agency standards. Our members have already ordered hundreds of these trucks to get them on the road fast – and this is only the beginning.

We encourage our industry partners to join us.

CRT is proud to join Mayor Foster and the Port of Long Beach in inviting shippers, trucking companies and ocean carriers to join us as we move towards providing cleaner, safer and more reliable service at the Port.

Please visit us at www.responsibletrans.org for more information on CRT and to join us as we work with you to create a more environmentally-friendly City of Long Beach.

Our Efforts will:

- ✓ Reduce Truck Emissions
- ✓ Enhance Air Quality
- ✓ Better the Lives of Long Beach Residents
